№ 22 від 18 квітня 2022 року

Ukraine District Heating Energy
Efficiency Project

The Open Letter

On the morning of February 24, 2022, the Russian Federation launched a large-scale war against Ukraine. During Russia's military aggression, missiles and military aviation destroyed a large number of civilian infrastructure objects. In particular, a significant number of objects of the district heating system, including boiler houses, heating stations, district heating networks, etc., had been demolished in many cities of Ukraine. In order to restore the provision of the population with heat and hot water supply services, district heating companies require urgent material and financial assistance.

“Ukrteplokomunenergo” Association (hereinafter - the Association) unites the largest District heating (DH) companies of Ukraine and for more than 30 years and represents their interests in various state and executive bodies, including the Verkhovna Rada of Ukraine, the Cabinet of Ministers of Ukraine, the National Energy Regulatory Commission (NEURC) and in many other state and governmental institutions and organizations. Owing to direct participation of Association members and relevant experts the major part of the legal documents that directly relate to the industry functioning had been developed. Specialist trainings, international conferences and congresses, many other events aimed at ensuring sustainable and efficient operation of the state's District Heating sector were held on a regular basis.

Today, in the context of the Russian military aggression against Ukraine, the Association is collecting and analyzing the options of purchase of the necessary materials and equipment required for restoration of DH companies' infrastructure. Association maintained permanent dialogue with DH companies in the combat zone.

In view of the above, we ask you to consider the possibility of providing assistance in financing the purchase of materials and equipment necessary for the repair and restoration of heating facilities. With your consent, we are ready to provide a list of specific companies that need help, as well as the amount of help needed.

Sincerely,

President
Association "Ukrteplokomunenergo"

A. Blashchuk
